

AIU Global Opportunities Hub

Connecting Students to World-Class Academic and Career Success.

PROBLEM STATEMENT

The challenge of navigating a fragmented international opportunity landscape.

THE SEARCH STRUGGLE

Fragmented Information

Students currently navigate a maze of emails, social media, and disparate websites to find internships and exchange programs. This leads to:

- Significant time loss in manual searching
- Missing deadlines due to lack of central tracking
- Confusion and inconsistent application requirements

SOLUTION OVERVIEW

A centralized digital gateway for global career and academic growth.

UNIFIED ECOSYSTEM

Student Portal

Browse global internships, view program details, apply online, and track status—all from a single, intuitive interface.

Admin Dashboard

Powerful tools for university staff to manage opportunities, review applications, and track global activity efficiently.

KEY PLATFORM FEATURES

Global Map

Visualize partner university locations and geographically explore worldwide research and exchange openings.

Student Profiles

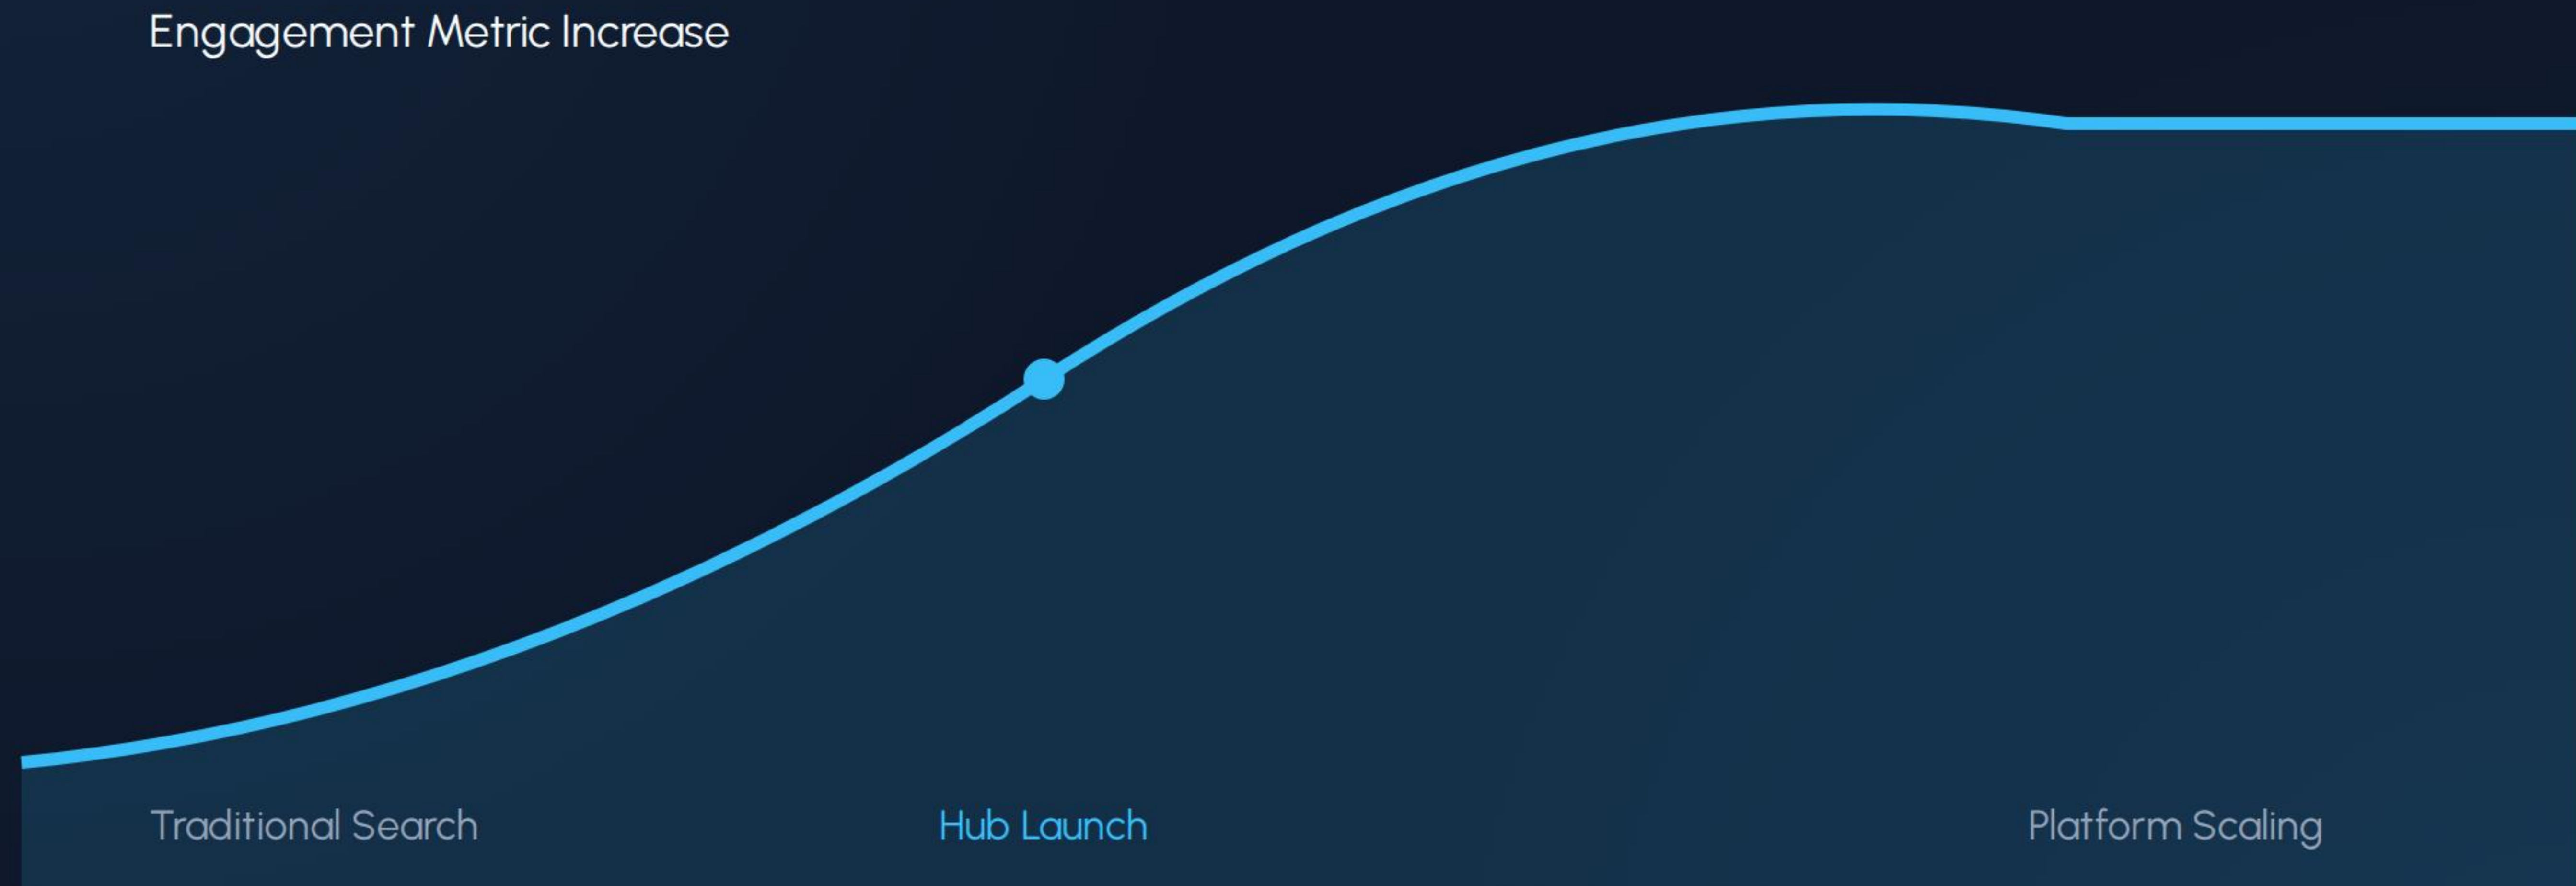

Personalized dashboards for students to build profiles, save opportunities, and monitor application progress.

Role-Based Access

Secure, role-specific views for students and administrators to ensure data integrity and ease of use.

EFFICIENCY AND ENGAGEMENT

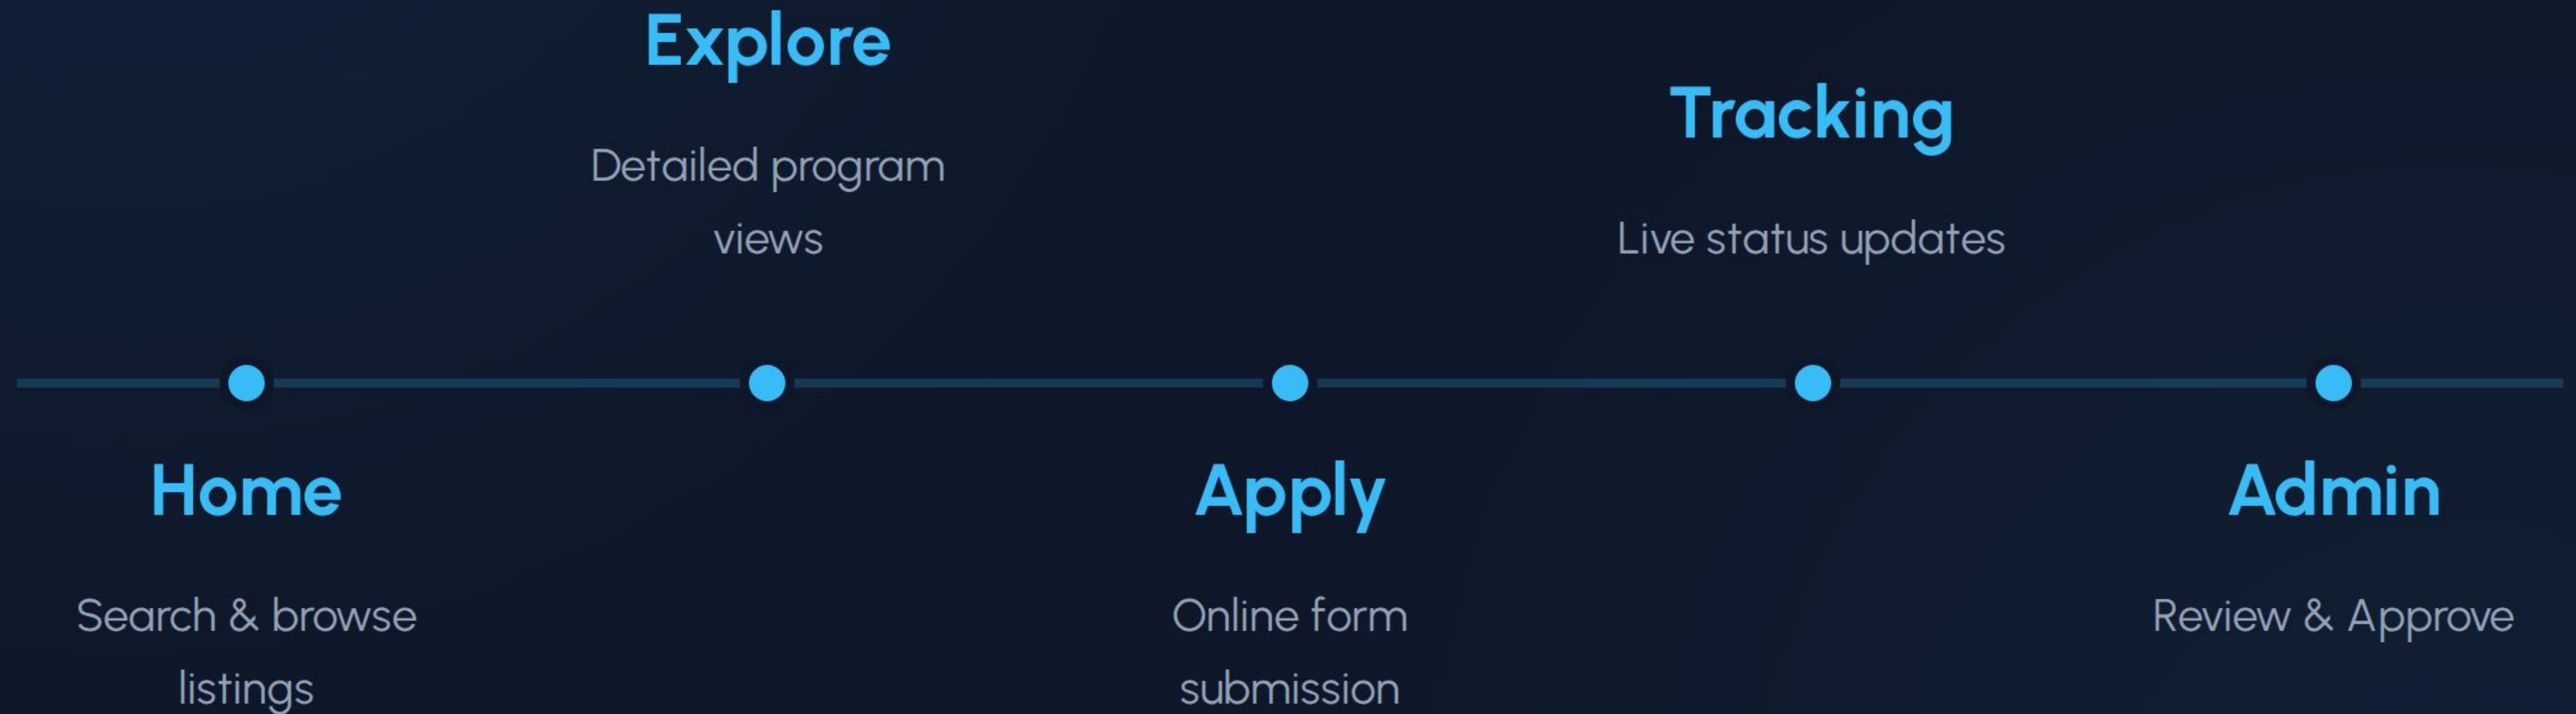

The platform reduces search latency by **70%** while increasing total student applications through better visibility.

SYSTEM DEMO

A seamless journey from browsing to administrative approval.

END-TO-END WORKFLOW

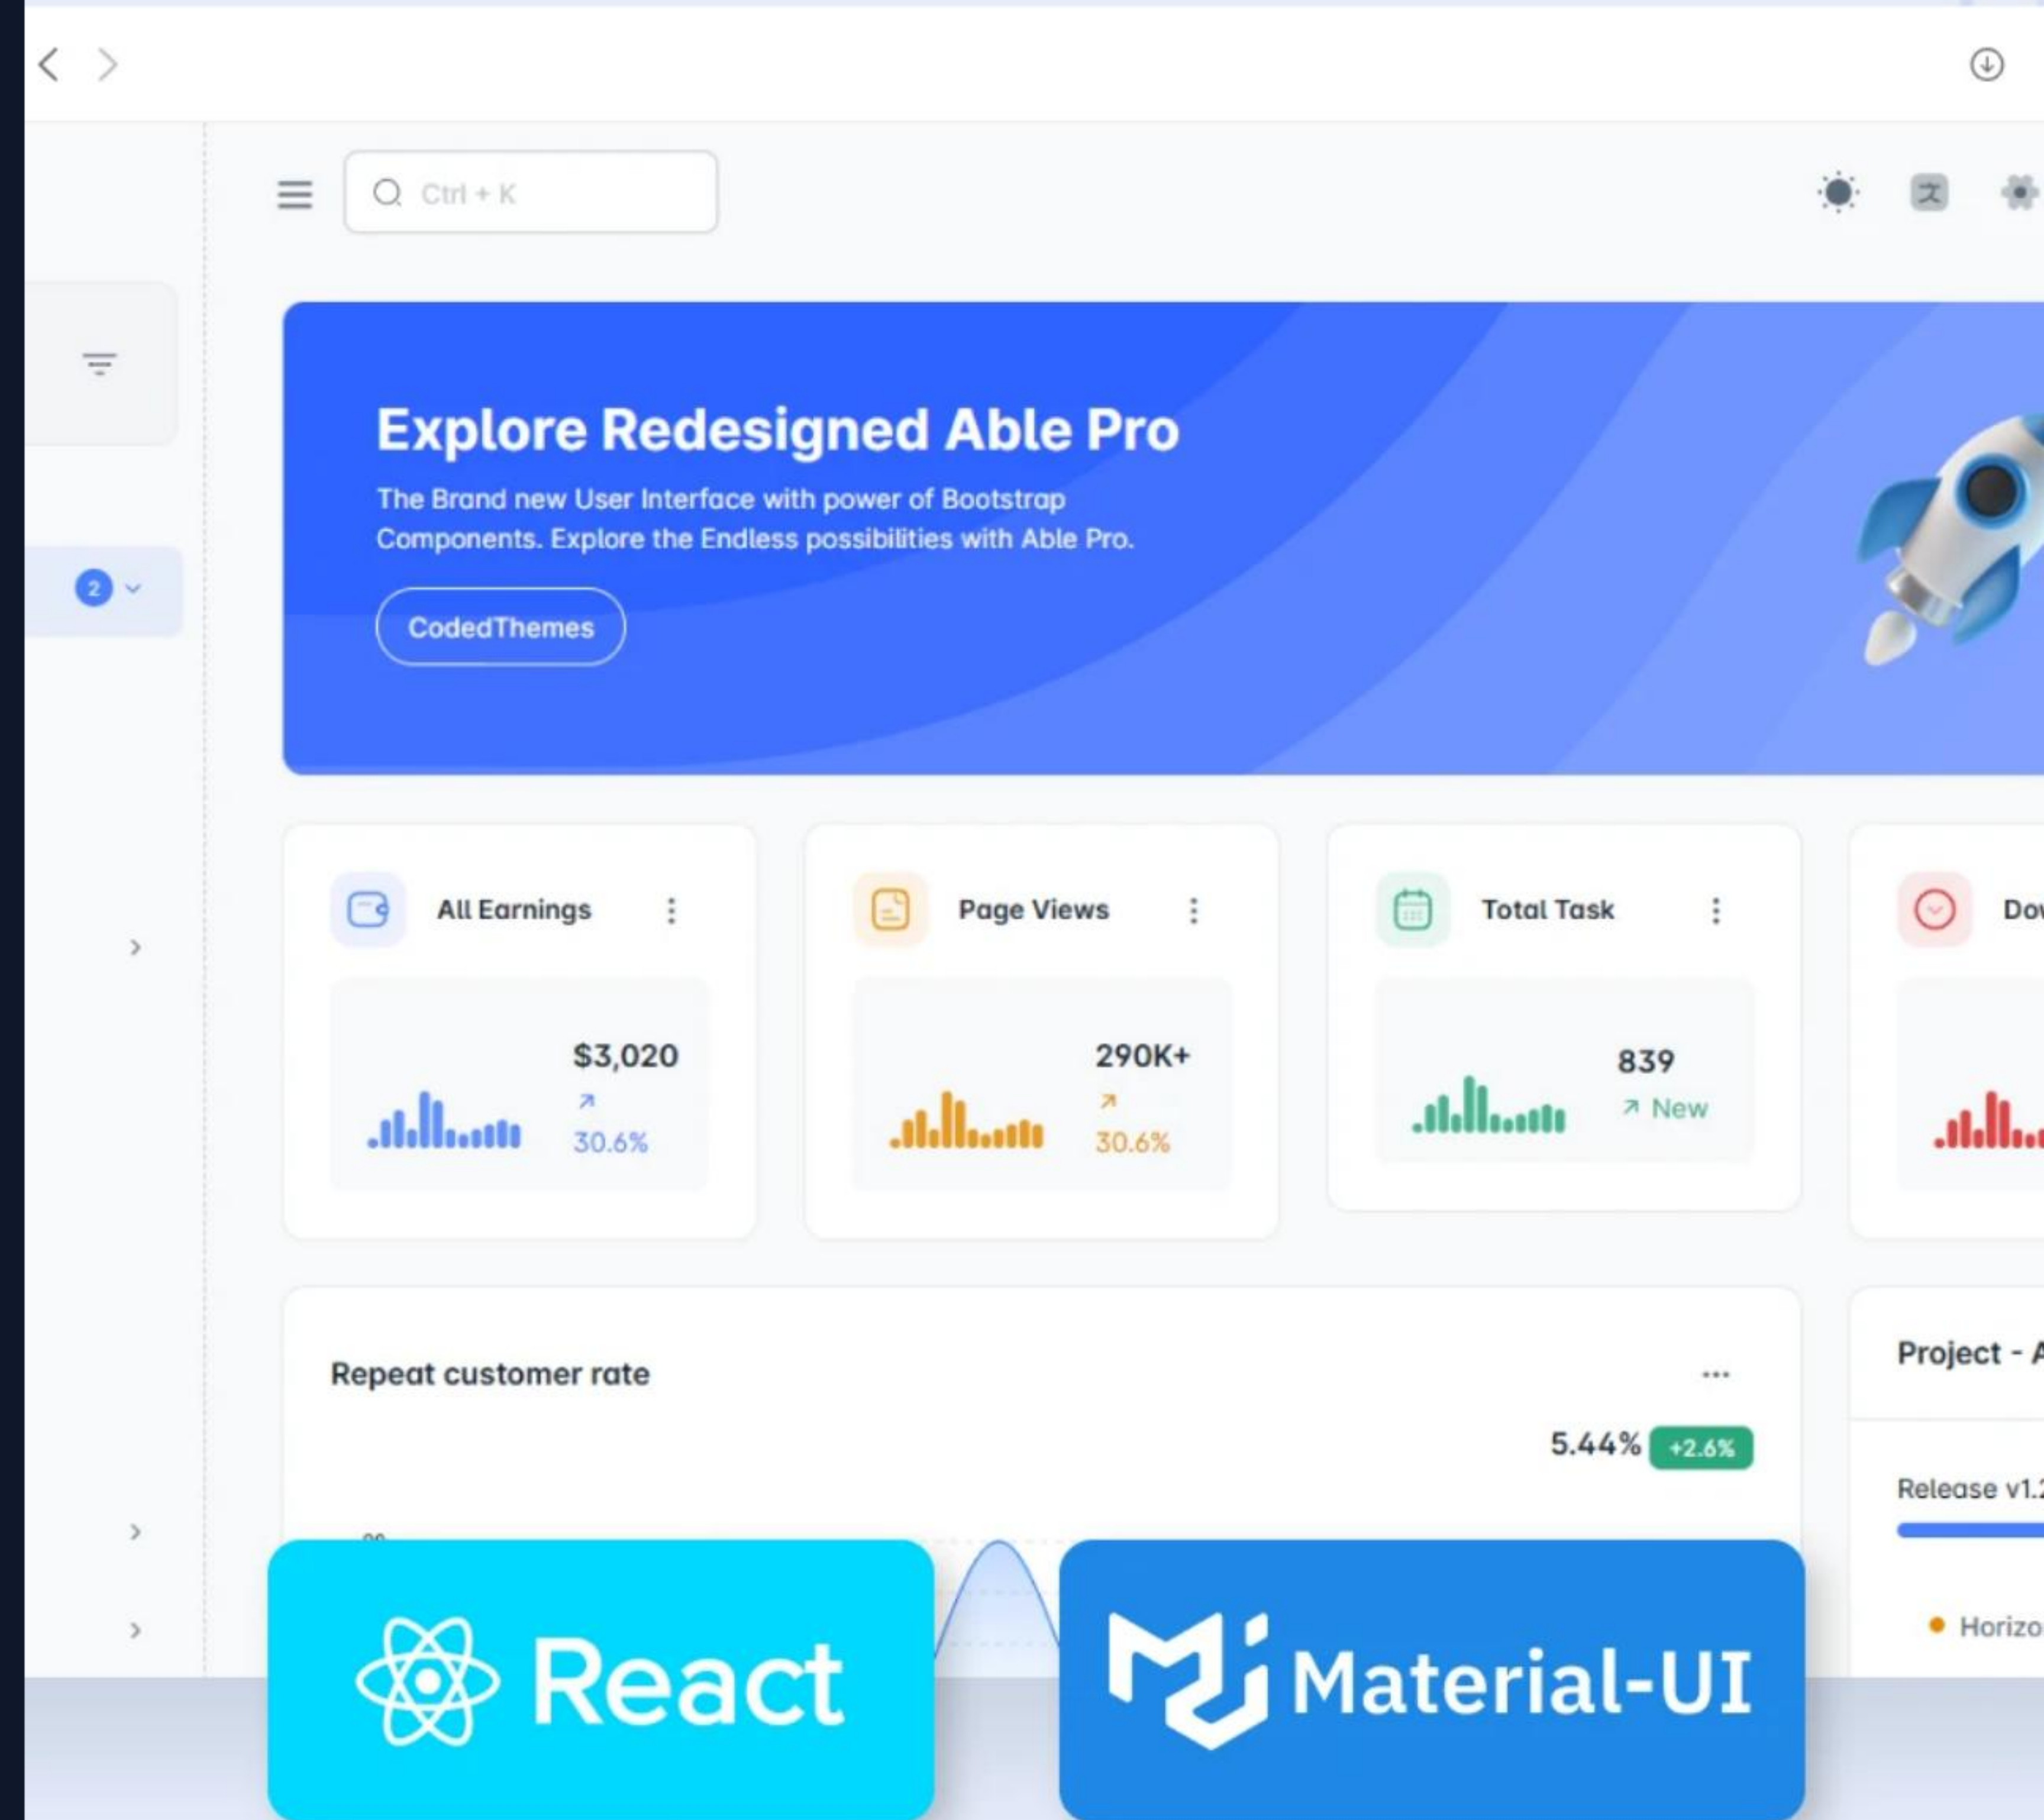

ADMIN CONTROL

Efficiency at Scale

The Admin Dashboard provides university staff with high-level metrics and granular control. Maintain user accounts, update listing details, and manage the approval lifecycle in one consolidated workspace.

Role-based dashboards ensure information is relevant and secure for every stakeholder.

DEVELOPMENT TEAM

ROLE	CORE RESPONSIBILITY	KEY DELIVERABLES
Frontend Developer	Interface & Dashboards	HTML, CSS, Responsive Forms
Backend Developer	Logic & Database	Node.js API, Express Server
DB Developer	Data Architecture	MongoDB Collections & Modeling
UI/UX Designer	Usability & Flow	Page Structure & Prototype
Tester/Integrator	Functional Verification	E2E Flow & Data Integrity

Thank You

Your Global Future Starts Here.
